PRIMARY EXAMINER

Allowable Subject Matter

1. Claims 1-20 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach a device and a method for processing FSK signal including caller ID, comprising an analog-to-digital converter to convert the FSK signal into a digital FSK signal; a first filter to provide a first signal; a second filter to provide a second signal; and a circuit calculating an energy level for each of the first and second signals, and selecting the first signal for output if the energy level of the first signal is smaller than that of the second signal, and selecting the digital FSK signal for the output if the energy level of the first signal is greater than that of the second signal, as substantially described in independent claims 1, 9 and 17. These limitations, in combination with the remaining limitations of claims 1, 9 and 17, are not taught nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Stevenson (6,265,948) teaches a FSK demodulation.

Lee et al (6,480,589) teaches a CPE alert signal detector and caller ID detector.

Art Unit: 2643

Yang (6,160,857) teaches a FSK demodulation.

Kim (5,970,128) teaches a telephone device for caller ID.
